

## PACKAGE DESIGN CONSOLIDATION

# Do You Have Too Many Boxes?

## Results: Improved Efficiency

Multiple packaging designs and samples were presented along with the financial data associated with material, labor and shipping costs.

**Over \$300,000**

In annual packaging costs savings

**Consolidated Designs**

Over 100 different cartons down to 20

**Warehouse Space Saved**

By eliminating redundant boxes

## INDUSTRY

## Warehouse Packaging

## Packaging Design Challenge

### *Does this sound familiar?*

“As new products and part numbers were created we just came up with a new box. Next thing we know we have hundreds of boxes that are all pretty much the same size.” Don’t worry, this is an area of expertise at BoldtSmith Packaging. We work with customers to consolidate and reduce the number of boxes.

## Requirements

Consolidate package designs

Reduce package complexity

Lower annual packaging costs

## BoldtSmith Actions

### *Packaging consolidation begins with asking the following questions:*

- 1 Are you constantly trying to manage inventory on hundreds of boxes?
- 2 Are low-volume boxes killing your bottom line?
- 3 Do you have boxes that have been in the warehouse for over 6 months?
- 4 Do you have different boxes for the same size product?
- 5 Is your warehouse busting at the seams with empty boxes?
